Objective

Computer Science student focused on applying academic knowledge to real-world software projects. Capable of solving practical problems and handling real-time technical challenges. Motivated to contribute effectively to a team while learning from experienced professionals. Committed to continuous learning, professional growth, and quality results.

Education

Dr. Lanka Palli Bullayya College of Engineering

B.Tech in Computer Science and Engineering, CGPA: 7.38
(Affiliated with Andhra University)

2022 – 2026

Visakhapatnam, Andhra Pradesh

Nava Jeevana Christian Junior College

Intermediate (MPC), (Board of Intermediate Education), Percentage: 75.8%

2020 – 2022

Visakhapatnam, Bheemili

Z P H S Challapeta School

(Board of Secondary Education), percentage: 90.6%

2019 – 2020

Vizianagaram, Challapeta

Internship Experience

Full Stack Python Development – AICTE | Certificate

(Onsite) Jun2025 – Oct2025

- Learned and applied Python fundamentals and data structures.
- Built a strong foundation in vanilla JavaScript, HTML, and CSS.
- Developed a project using Flask, Bootstrap, and jQuery.

Skills

Programming Languages: Python, Java, C, JavaScript

Web Technologies & Frameworks: HTML5, CSS3, Bootstrap, Flask, Fast API

Database Technologies: SQLite, MySQL

Development Tools: IDLE, Jupyter Notebook, Eclipse, Visual Studio Code

Version Control Systems: Git, GitHub

Productivity Tools: Microsoft Office (Word, Excel, PowerPoint)

Soft Skills: Attention to Detail, Team Leadership, Communication, Creative Thinking, Time Management

Projects

ResQ Call | GitHub

- Engineered an AI-powered emergency response platform using Google Gemini API to analyze user symptoms and predict medical urgency in real time.
- Implemented a live tracking and dispatch system using Google Maps / Leaflet to locate users and assign the nearest ambulance dynamically.
- Architected intelligent hospital routing by evaluating distance, capacity, and specialization to optimize emergency response decisions.
- Developed a secure backend using Flask, JWT authentication and MySQL to manage users, emergencies, and real-time dispatch data.
- Build a full-stack emergency response system using HTML, CSS, JavaScript, Flask, MySQL, Leaflet / Google Maps, integrated with Google Gemini API, JWT authentication, bcrypt security, and Git-based version control.

Online Book-Selling Platform | GitHub

- A web-based platform designed to manage inventory, user registration, and search functionality.
- Gained hands-on experience in full-stack web development, database integration, and secure user access.
- Enabled admins to manage catalog and users to browse and purchase books seamlessly.
- Designed using HTML, CSS, JavaScript, Python, Flask, and SQLite.

Certifications

- Core Java – Digi Soft AI
- Interview Skills, Communication Skills – TCS iON
- Introduction to Machine Learning – Infosys Springboard
- Classes, Objects, and Packages in Java – Infosys Springboard
